Homework 1:-

Section 1-1

(2)

Ans: II) Measure the heights all engineering Majors. because it is the Sample of Convenience.

(3)

(a) False

(b) True

(4)

(a) False

(b) True

(5)

(a) No, the population proportion of defectives has to be considered. Sample percentage alone is an approximation.

(b) No, the population is independent from the sample proportion. So that the sample proportion may be 11 % but population proportion might be different.

(6)

(a) False
(b) True
(c) False

(7) A good knowledge of the process that generated the data.

(8)

(a) Observational study.
(b) NO, There have to be more observational studies, which has same or similar results.

(9) (a) Controlled experiment.
(b) yes, because it is based on a controlled experiment, not an observational study.
